ProMIS **ERP** is ideal for organizations planning to implement enterprise wide solutions to integrate and automate overall business functions. *ProMIS* ERP can be customized as per the organizational requirements.

We believe that each company has its own way of functioning and the information systems should be designed to be exactly suitable their business activities. Since the design and development of *ProMIS* is in-house, we are capable of modifying the ERP system as per the existing business procedures and practices followed by the client without redefining them completely. This will ensure smooth conversion from the existing system to the *ProMIS* ERP system.

The standard ERP implementation includes the following modules:

♦ **Financial Accounting**
♦ **Inventory Control**
♦ **Purchase Order Processing**
♦ **HR & Payroll**
♦ **Fixed Asset Management**
♦ **Budgeting**

Depending upon the industry type and operational requirements, specific modules may be required.

Trading

Trading companies will require a comprehensive solution to handle the Sales activities. Hence for such implementations we offer a **Sales Order Processing** module in addition to the standard modules mentioned above. The operational procedures are different in case of pure B2B transactions and B2C. Besides this the implementation for Retail segment will have unique features.

Contracting

For contracting companies involved in the **Supply & Installation** of goods and services need to estimate the cost involvement in material, manpower and overheads accurately before quoting for Jobs/Projects, monitor the ongoing projects and to conduct a post implementation analysis. Our **Project Costing** module with the **Work/Job Order Processing** is designed to offer this functionality.

Construction

Construction companies will require a **Project Estimation & Management** module to estimate, monitor and analyse the projects.

Equipment/Machinery Dealers

For Equipment and Machinery dealers, we can offer:

♦ **Work/Job Order Processing**
♦ **Warranty Management**
♦ **Service/Repair Management**

modules in addition to the **Sales Order Processing** and other standard ERP modules.

Readymix

Our solutions for Readymix and Concrete industry includes:

♦ **Order Scheduling**
♦ **Production Planning**
♦ **Delivery Management**
♦ **Fleet Management**

Legal firms

The turnover of professional firms depend upon maximizing the billable hours. Hence we offer a complete **Practice Management Solution** with:

♦ **Clients & Cases Management**
♦ **Employee Timesheets**
♦ **Time Billing**
♦ **Performance Analysis**

which is integrated with accounting.
